DEXTER HORTON BUILDING, SEATTLE 4, WASHINGTON

Bulletin No. 20

June 8, 1956

1956 DIRECT SEEDING PRICES  
Washington and Oregon

With predictions of a better than average cone crop this season we are preparing to enter into aerial seeding contracts for the 1956-57 season.

The total cost per acre for (1) Douglas fir seed; (2) chemicals; (3) treating of seed; (4) transportation; and (5) cross-flying by helicopter (including pilots and mechanics) is shown below:

Quantity Douglas Fir Seed	PF-4 Using Methocel and WRL-2	PF-2 Using Rhoplex and PF-1	Certified Maningseed* Douglas Fir	Total Price Per Acre using PF-4
1/2# seed/ acre	\$1.34	\$1.75	\$ 5.50	\$ 6.84
3/4#	\$1.39	\$1.98	\$ 8.25	\$ 9.64
1#	\$1.43	\$2.21	\$11.00	\$12.43

Extra charge for field supervision, if required: \$0.20 per acre.

\* Estimated 1956 seed price, subject to change without notice.

Within the past six years, we have contracted to seed by helicopter over 40,000 acres of land both by the baiting method and seed treatment method.

Should your firm be interested in direct seeding in 1956, we think it would pay you to write immediately giving the acreage, the species to be used, the elevation, and, if possible, aerial photographs or maps locating the areas to be reforested. Our staff is at your service.
